Product Discontinuation: WinREG by End of 2024

Dear Sir or Madam,

We would like to inform you that we have made the decision to discontinue support for our product "WinREG":

1) Affected Product

Parameterization software WinREG, last version 4.2 R11.

2) Reason of Discontinuation

We have opted to develop new software for the REG-D™ and REG-DP products, which will comprehensively replace the functions of WinREG.

3) Available Functionally Identical Replacement Products

- AE Toolbox (supports our REGSys™ and EORSys product groups)

3) Existing Devices in the Field

- The software will no longer be maintained, and no new versions or security updates are planned after the specified date.
- The software in the field can still be used (at your own risk), but we recommend transitioning to the current AE Toolbox promptly. You can find a link for free download on our website:

<https://www.a-eberle.de/en/downloads/downloads-voltage-regulation/> → AEToolbox

Please relay this product information to your colleagues and potentially to your customers.

We apologize for any inconvenience that may arise from this discontinuation.

For further inquiries, please contact your primary point of contact directly.
